

Crystal Reports

Crystal Report Writer (CRW) is a third-party software product that enables custom reports to be created or modified for use in products like the Aloha system. A run-time version of the product is included as part of the Aloha system. Use the RDB Crystal Reports choice in the Reports menu is used to integrate reports created by Crystal Report Writer. The run-time version of the program does not provide the ability to design new reports. It merely allows the running of reports built in the CRW format. To create reports using CRW requires a full version of the program. For more information on CRW, consult Abacus Business Solutions.
