

Partnership and Interface Guide

August 2011

Please note this guide is published periodically with quarterly updates and subject to change without formal notification. Please contact your Radiant Systems Account Executive or Authorized Radiant Channel Partner for the most up to date information regarding available interfaces for the Aloha Point of Sale.

All of the interfaces included in this guide are created by Radiant Systems or by an Authorized Third Party. Any interfaces owned by Authorized Third Parties are not developed or maintained by Radiant Systems and are the responsibility of the third party. Third party interfaces listed in this guide are being provided as available options only and are not recommendations. You are solely responsible for selecting the interface that is appropriate to your specific business requirements and technical environment.

**Please report any proposed changes, errors or submissions to:

END USER LICENSING REQUIREMENT FOR ALOHA CONNECT SOLUTIONS

Some of the solutions noted in the following section are recognized as requiring Aloha Connect licensing. This requires the following key activation on the Aloha Software Key:

A software key is licensed at the site level for Aloha Connect. Since this is a site level license, a quantity of one (1) is required no matter the number of applications leveraging the license. As part of the license, External Interface Terminals (EIT) should be activated on the software key. The number of EITs to be activated coincides with the number of interfaced applications.

- One EIT designated for each interfaced application
- One EIT designated for each hardware device that is integrated (kiosk, mobile device, etc)

For the Aloha Connect license to be functional, a minimum of one (1) EIT must be licensed. There is no maximum for the number of EITs that may be activated for standard Table Service or Quick Service Aloha software key.

Example:
Site has web ordering, mobile payment and handheld ordering. They will need one Aloha Connect license and three external interface terminals (EIT).

Aloha POS Integrations

You have made a significant investment in your technology solution.

Ensuring that you can maximize that investment with interfaces to existing technology and new niche market solutions is a top concern.

Aloha Connect provides a structured framework for you to extend the capabilities of your Aloha solution, add breadth to your technology and meet your business needs today and in the future. Leveraging language-neutral development tools to extend Aloha's rich functionality to other applications, Aloha Connect Licensees can seamlessly integrate approved third party applications to their Aloha solution.

Age Verification

WE SCAN™ offers solutions that make age & ID verification easier, faster, and more accurate than ever before. Our age & ID verification solutions help guard against selling to a minor, which may lead to costly fines, suspension or loss of license, and risk of criminal prosecution and civil penalties. With the swipe of a driver license, WE SCAN™ proactively helps protect the business by decoding the encoded data of all state jurisdictional formats, verifying important information by displaying customer name, age, date of birth, driver license number, and expiration date. Unlike other age verification products, our technology integrates with existing Aloha POS hardware and software and includes important storefront deterrent posters and stickers as the “Front line of Defense”; notifying visitors their ID will be scanned and verified. Optional applications available include: Visitor Tracking, Compliance Reporting, Loyalty tools and Independent, third party ID verification.

Beverage Inventory Control

MAKES EVERY OUNCE COUNT

An innovator in its field, The Bevchek System is a unique and dynamic beer monitoring system designed specifically to control beverage slippage in the hospitality industry. The system provides hospitality establishment owners and operators with product sales from their Point of Sale (POS) terminals relative to real time pours. Users are able to view the live, time-stamped data via the web at anytime as well as receive real time alerts via email and SMS.

Bevchek also provides advanced corporate level functionality, real time data analysis and allows the client to view data trends in multiple formats over any time period as well as any location or group of locations within a company or concept.

Beverage Inventory Control

FreePour Controls Inc. is a leading developer of inventory control systems for the hospitality industry. The company has been in business since 1987, offering a complete line of bar inventory management products. The solutions we offer help manage inventory and deliver profits to our clients.

Freepour Controls has a solution, for draught beer and liquor products, to suit the diverse needs of the hospitality industry in beverage cost management. Each solution has the same fundamental benefits – fast, easy, accurate, invisible to customers, and can be interfaced with your Aloha system.

The FreePour solutions provide powerful and timely reports that make your bartenders accountable, thereby creating a deterrent to waste, spillage, over pouring, and theft. The result is increased bar profits that inevitably cover the cost of the systems.

Techknow is a technology company servicing specifically the QSR segment. We focus on drive-thru business and performance factors that increase customer satisfaction and employee efficiency. Techknow's entrepreneurial style and industry experience enable us to develop products, like the OCS-300 and CTS-1000, that meet our customer's needs from a simplicity and ease of use standpoint. We are the technology innovation leader in this segment, introducing the first OCB with full color graphics and marketing capability of specific products and/or events. Most importantly, our products are developed from customer feedback with a primary focus on improving their profitability through customer sales.

DTTStage1.exe is an all new effort from DTT to utilize all of the Aloha Spy Data provided by Aloha QS or TS terminals for integration with DTT DVRs. The latest release supports TCP and Serial connectivity while providing optional Encryption for those that desire extra layers of security. No longer is the local Alohaspy service required on the BOH server. The new Stage1 application replaces the former Alohaspy service. Added flexibility to accommodate facing numbers as well as compensate for facing number discrepancies prior to version 6.4.27.

QS/TS versions 4.1.62 and higher must be utilizing DTT's DVR.

Envysion™

Envysion's Managed Video as a Service (MVaaS) enables multi-unit operators to easily leverage remote video to better understand their business and improve profitability 10-15%. The highly scalable, centrally managed and bandwidth sensitive service is designed for everyday use by thousands of users across multiple departments without straining the IT organization or network.

Envysion Insight goes beyond traditional security and loss prevention applications by integrating with point of sale systems, such as Aloha, to provide a robust set of exception reporting, alerting and event search capabilities. This feature, together with data integration, enables operators to efficiently focus on actionable business insight and translates to rapid operations and profit improvement.

Aloha Guest Manager Integrations

Providing a memorable guest experience will set you apart from your competition and keep your customers coming back. The new innovative Aloha Guest Manager solution intelligently tracks table status, reduces the time tables that are left unseated, maximizes seating efficiency and captures key guest information to help you provide personalized service.

Radiant System's Aloha Guest Manager solution allows you to improve your guest experience by seating your guests quickly and efficiently and quote accurate wait times. It offers reservation management, waitlist management, table management and guest tracking that is synchronized in one tightly integrated solution with the Aloha Point-of-Sale.

Aloha Guest Manager Benefits

- Seat More Guests
- Increase Seat Utilization
- Enhance Guest Experience
- Increase Host Productivity
- Enable Operational Analysis

Aloha Insight Integrations

Restaurant operators need centralized hosted applications to efficiently analyze operational data and automatically alert management to issues that require attention.

Aloha Insight is a web-based application that collects sales and labor data at the restaurant and makes it available via the Internet and through distributed reports. This powerful tool provides critical capabilities to your business such as drilldown viewer options for fast, high-level to granular examination of data, real-time reporting and data replication for local data warehousing and exports to accounting, payroll, and HR systems.

Preferred Vendors

Radiant Systems' point-of-sale (POS) terminals, kitchen display systems, kiosks, back office PCs, peripherals and handheld devices are designed to maximize simplicity and speed in every part of your restaurant's operation. Radiant hardware takes orders faster up front, routes them more precisely for kitchen staff, presents them more fully to customers and records them more securely for management.

Built from the ground up to withstand long hours of constant use, spills, dirt, grease and other harsh conditions common to restaurants, Radiant hardware also minimizes costly and disruptive downtime. Day in and day out, Radiant hardware increases sales and customer satisfaction while keeping costs down.

Key Features and Benefits

- Grow Revenue and Profits
- Enter Orders Faster
- Increase Order Accuracy
- Speed Up Food Production
- Improve Data Security
- Maximize Uptime
- Minimize Disruption
- Invest Wisely

Cash Drawers

The Recognized Leader

APG offers a wide variety of heavy duty and standard duty cash drawers for all types of POS environments. APG Cash Drawer, LLC is the retail industry's leading manufacturer of cash drawers and other POS related products. Serving thousands of customers around the world, APG has a reputation as a designer and manufacturer of the most durable and dependable cash drawers in the industry. Our heavy-duty products will be the most reliable component in your workstation. APG offers a wide range of cash drawers for applications found in Retail, Food, Hospitality and Convenience Stores.

Leasing Companies

Established in 1979 Vend Lease is an equipment leasing company whose specialty is providing customized POS lease programs to the Hospitality Industry! As the POS industry's premier DIRECT FUNDING SOURCE (we are NOT a broker!), we are able to put our niche oriented expertise to work in helping you move more equipment - "MORE APPROVALS = MORE SALES". We offer a "One Stop Shop" for A, B and C financing. We approve start-up businesses "in-house" with no dollar or term restrictions. Vend Lease controls all transactions from receipt of a credit application - until final funding. Please contact VLC to discuss how we can become a strong lease partner for your company.
